Today in 21st Century with emphasis on globalization, e-commerce, Internet trading, the environment faced by businesses has changed its face a great deal. With increasing competition and more emphasis on Quality products and services to be offered to the customers, it is becoming difficult to gain customer confidence. The customers don't have the time and zeal to spend in searching the supplier who will supply quality product and services, in turn they want to rely on a third party evaluation. Thus, getting your organization ISO certified has become the need of the hour.

About BMS

BMS Certification (P) Ltd. (BMS) is one of the fastest growing multinational Certification Body consisting of highly experienced professionals offering the latest in systems certification and promoting quality concepts.

BMS is originally registered in India, and accredited from Dubai Accreditation Department (DAC) for ISO 9001:2008 Standard. DAC is a member of international organizations (ILAC, IAF). This issues guarantee for professional level of work and approach of DAC. BMS is also independent certification body for other international standards like ISO 14001, OHSAS 18001, ISO 27001 and ISO 22000.

Why BMS

- * We are worldwide well-recognized multinational certification body having the-ups in several countries.
- * We only use experienced auditors who are trained to carry out assessment with minimal disruption of work.
- * We are flexible, quick and professionally managed company.
- * We are not interested in just "winning contracts" with our clients. We seek long-term relationships with our clients.
- * We will be both courteous and sensitive to your staff at all times. We fully understand the stress that people experience during an audit.
- * We believe in quality and not quantity.

BMS Auditors

BMS Auditors are highly experienced and trained to carry out assessments with minimal disruption of work at client place. Our clients are assured with the competency and integrity of Auditors. They are qualified and meet all requirements of the International Register of Certified Auditors (IRCA) of the United Kingdom or other internationally recognized institutions.

Management System Certification

- * Quality Management System (ISO 9001:2008)
- * Environmental Management System (ISO 14001:2004)
- * Occupational Health & Safety Management System (OHSAS 18001:2007)
- * Information Security Management Systems (ISO 27001:2005)
- * Food Safety Management System (HACCP/ISO 22000:2005)

Quality Management System (ISO 9001:2008)

ISO 9001:2000 standard is designed to provide a framework to guide organization towards continual improvement and achievement of customer satisfaction. The basic intention behind this standard is to provide the universal baseline for quality management, which can be used by companies around the world. This has become the most widely used quality management system in the world.

Benefits of ISO 9001:2008

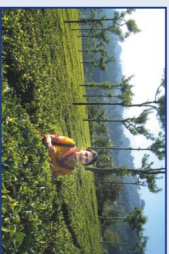

- * Provides a systematic and visible approach for continual improvement in the performance.
- * Edges over competitors who are not accredited.
- * Increased customer confidence and international acceptance.
- * Structure the operations of the organization to achieve desired results.
- * Creates brand name of the organization.
- * Helps to increase the effectiveness and efficiency of the organization.

Environmental Management System (ISO 14001:2004)

The ISO 14001:2004 is focused on environment issues and identification for setting objectives and targets besides compliance with applicable legislative and other regulatory requirements. It examines issues such as allocation of resources, assignment of responsibilities and systematic evaluation of practices, procedures and processes.

Benefits of ISO 14001:2004

- * Minimizes organization's impact on environment.
- * A foundation to develop future environmental initiatives.
- * Improve operational efficiency that leads to cost savings.
- * Energy conservation.
- * Reduce environmental liability.
- * Maintains good public and community relations.
- * Shares common management system principles with ISO 9000 and OHSAS 18001 enabling integration of your quality, environmental and occupational health and safety management systems.

Occupational Health & Safety Management System (OHSAS 18001:2007)

OHSAS is an assessment specification for Occupational Health and Safety Management Systems. This standard has been designed to assist the organizations to formulate an effective health and safety system in the organization by defining policies and procedures as per International Standards.

Benefits of OHSAS 18001:2007

- * A structured approach to hazard identification and risk management which can contribute to the provision of a healthier and safer working environment and the avoidance of a high proportion of accidents and occupational health problems - this should help reduce lost time through employee illness and injury.
- * An increase in staff motivation by active participation in the process of continuous improvement and hazard reduction.
- * Improve relations with Industry and Government as this standard is designed to ensure that legal regulations are complied by the organization.
- * Enhances the public image of the organization.

Information Security Management System (ISO 27001:2005)

It is the standard, which specifies requirements for implementation, establishment, operation, monitoring, research, maintenance and improvement of documented Information Security Management Systems (ISMS). It specifies requirements for establishment of a safety control, adapted according to needs of an organisation. The organisation declares the assurance of information security management system requirements by certification according to ISO 27001:2005.

Benefits of ISO 27001:2005

- * Customers are assured that the organisation has undergone a competent, impartial, independent assessment and information is safe whilst in its care.
- * Using information security measures builds confidence with customers and suppliers.
- * Ensures that an appropriate management system is in place to look after the security of the organisation's own information.
- * Availability of secure electronic data transmission techniques to enable society to use the internet as a means of conducting their personal, business and pleasure activities.
- * Management and Handling of Security Incidents.
- * Ability to Differentiate Organization for Competitive Advantage.

Food Safety Management System (HACCP/ISO 22000:2005)

A Food Safety Management System demonstrates an organization's commitment to food safety, and provides a means to demonstrate that an organization is taking the necessary steps to control food safety hazards. It applies to all organizations, regardless of their size, that impact the food chain. This includes ingredient suppliers, equipment manufacturers, package suppliers, service providers, farmers, food processors, and catering and retailing organizations.

Benefits of HACCP/ISO 22000:2005

- * Allow organization within the food chain to demonstrate their commitment to food safety.
- * Improved documentation more efficient and dynamic food safety hazard control.
- * Reduces the need for, and the cost of end product testing.
- * Reduces the likelihood of product recall & adverse publicity.
- * Enhances customer satisfaction / reduces dissatisfaction.
- * Facilitates better understanding of food packaging safety issues throughout the organization.
- * Improves staff morale and motivation through a cleaner working environment

What people say about BMS:

BMS auditors have really added value through their professional expertise to our quality systems. We are grateful to them.

Mr. Manoj Sharma, Director, Redox Technologies (P) Ltd., India

BMS is really a professionally managed company. I am just impressed with their services.

Mr. D. Gomes, London School of IT Education, UK

We at BMS, ensure you that we will provide you best quality ISO Certification at competitive prices.
